## FARMERS!

I have on hand a supply of PRAIRIE PRIDE FLOUR which I am selling at \$2.90 per Hundred. Government Orders accepted the same as cash. I have heard a report to the effect that this flour has been refused in grade since the Lake of the Woods Mills took over the Medicine Hat Mills. I wish to contradict this report, as no change whatever has been made in the grade of this flour.

## The Backbone of National Prosperity.

FARMING is by common consent the basis of our national wealth and prosperity. The farmers of Canada have, for the past two years, been getting top prices for what they have had to sell and have been able to obtain what they have had to buy at moderate prices. The war means better times for farmers.

Where the foundations of national wealth and prosperity are sound and assured, hopefulness may build her structures with confidence. Business in Canada can and will be good if our business men will do their utmost to keep the bottom in business. Advertising is a good workman for this purpose.

## German Submarine Makes Daring Attack on British Cruisers.

### General Botha Takes Personal Command Against German Forces in South Africa.

London, Sept. 22.—The British warships Aboukir, Hogue and Cressy have been sunk in the North Sea by German submarines, according to an announcement given out by the official bureau this afternoon.

London, Sept. 23.—The destruction of three cruisers, Aboukir, Hogue, and Cressy by an attack of five German submarines in the North Sea was the severest loss the British navy has sustained during the war. Three cruisers and torpedo boats came quickly to the assistance of the doomed vessels, and it is reported sank two of the German submarines, while the three others escaped.

### North Sea Loss Placed at 1067.

London, September 24.—The latest estimate of the casualties in Tuesday's North Sea disaster gives 1067 of the 2200 officers and men on board the three warships as lost.

### Brave Midshipman Has Awful Experience.

London, September 23.—The Daily Telegraph correspondent in Rotterdam tells the following story of his description of the sinking of the three British cruisers:

"Commander Sells told me of the tragic experience of a brave little midshipman. It appears that the midshipman was on board the first vessel which was struck and as she was settling down, he jumped overboard and swam clear of the tremendous vortex which the disappearance of the ship had created. He was picked up by another of the cruisers, but she was struck by the submarine's torpedoes and in her turn began to settle down. Though he had again to jump to the water, he was uninjured by the explosion and cleared the downward suction. A third cruiser rescued him, but he had not been long on board her before she also received her death wound. Again he got clear and hung to a piece of wreckage from which he was rescued.

"This midshipman was pleased when we and the Titan rescued him, but he preferred to go back to England and accordingly we put him on board a destroyer and hope he is safe at home now. The destroyer also took most of the men I picked up."

Harwich, Sept. 23.—The Admiralty has informed as many relatives as possible of the names of survivors of the naval disaster and several such relatives arrived early. Among them was the father of the brave midshipman who was hurled from each ship in turn as it was struck by the German torpedo. This boy, scarcely in his teens, greeted his father with a pathetic smile. The father, a veteran retired naval officer, broke down.

### General Botha Will Command.

Pretoria, via London, Sept. 23.—The decision of General Botha, premier of the Union of South Africa, to take the field personally in command against the forces of Germany in South Africa, has aroused much enthusiasm here. The government in its announcement says it is aware that many citizens are anxious to serve with the British forces on the continent, but the Imperial government considers that priority should be given to the South African military requirements. Natal and Orange Free State will contribute their quota to Gen. Botha's army.

### British Raid Zeppelin Camp.

Antwerp, Sept. 23.—A successful raid, yesterday, by a squadron of five British aviators, on the German aviation camp, at Bickendorf, near Cologne, is reported by the Handelsblad. Bickendorf is the centre of the Zeppelin aircraft,

and according to the story, the Britishers, from a height of 1500 feet, dropped bombs that set fire to the hangars. Four of the aviators returned to the point of their departure, while the fifth was obliged to descend owing to engine trouble. He was successful, however, in landing on Belgian territory.

### Government Relief.

There has been some misunderstanding regarding the filling of relief orders for provisions being issued by the Dominion government.

Settlers getting these orders should know and remember that they can be filled at any store with which they may wish to deal and there is no compulsion to buy from any particular store.

W. P. Cotton, relief agent.

A harvest service will be held at All Saints' church on Sunday October 4th, at 11 a.m. and 7.30 p.m. Rev. A. W. Swayne will officiate both morning and evening.

## Candling Eggs

Many consumers appreciate the fact

that the quality of an egg can be

ascertained without breaking

the shell. The process of candling

is not difficult, and with the

view of encouraging consumers to

buy fresh eggs, the following

method of candling is being

it is not generally known that an

egg appears semi-transparent when

held before the light in a dark

room, and that, if properly related,

even minor defects may be seen.

Pamphlets dealing with this matter

have been prepared, and illustrations

included showing in detail the charac-

teristic appearance of both good and

bad eggs when being candled.

The contents of an egg when laid

completely fill the shell, but as cool-

ing takes place contraction occurs,

and the contents are drawn toward

the large end. The yolk is only slightly

perceptible and readily takes its

position in the albumen when the egg is

rotated.

# AMERICAN WOMEN WILL CREATE THEIR OWN MODES

W hat must exist for a time, because of wars and rumors of war, without imported champagne, imported beer and cheese and imported fashions, according to reports from authentic centers of information.

American designers of "American clothes for American women" are laboring over these reports, whatever the feeling of disappointment the importers of wine, beer and cheese may feel.

The women fashion designers quote that "it is an ill wind that blows no one any good," and if Europe must go and get herself tangled up in a terrible war we should take this opportunity to demonstrate our independence of Parisian modes.

These same designers are sure that they will be able to demonstrate that they are quite capable of creating styles in gowns and hats that will be far superior for our women to the im-

ported Parisian modes and thus break forever the domination over the female half of the United States which Paris has so long enjoyed.

The value of imported goods passing through the customs house in New York is from \$100,000 to \$100,000 daily. Domestic manufacturers will have the opportunity of a lifetime to demonstrate that they can furnish our country with commodities as good as

those imported. Foreign importation may get a black eye from the deplorable conditions abroad, but it is quite again, "It is an ill wind."

New fashions follow the wars as closely as a flock of sheep follows the shepherd, so it is fairly safe to predict that military fashions in Russia, in Persia, etc., will be evolved by our fashion experts.

But variety will make for picturesque. We are inclined too much toward uniformity of garb. Conservative women follow instead of lead; they affirm that they do not wish to be conspicuous. The natural style leader is bound to be noticeable, however, though she is not necessarily obliged to be bizarre. Simplicity is quite as noticeable.

Before the war situation became a menace the importers received some advanced autumn models, four of which are illustrated here.

The motor coat at the extreme left is the only domestic model shown. Very often the far lined motor coat is a bulky, shapeless affair, which utterly destroys any semblance of graceful figure lines. This new motor coat, however, is both graceful and up to date. It is of dark green cloth lined with muskrat and trimmed with civet. The cravat for fur trimming is fitted at in this French tailored gown for autumn. Broad bands of Persian paw

cutting detail and tulle. The short, short, velvet buttoned boots to another modern note.

The autumn girl in the country will wear a fascinating new sports coat, the very latest acquisition of the sweater. This is a white cotton corduroy coat in Mexican style, with figures borrowed from ancient Aztec symbols. The Mexican war is responsible for this style. This is the center illustration.

Buttons will be extremely popular for trimming autumn frocks and tailored suits. The arrangement of large horn buttons in rows flanked by simulated buttonholes of fancy braid adds marked style and emphasis to the graceful Bernard suit of cinnamon brown cloth. Buttoned walking boots with tops matching the brown shoes show beneath the short skirt.

## BE SURE TO FOLLOW THE DIRECTIONS

WITH one of the best up to date cleaning fluids come directions to place the fabric to be cleaned on blotting paper or many folds of soft old cloth. The woman who does this will find the pattern of the article cleaned will be reproduced in discolored lines on the blotting pattern, the fluid eating the grease and dirt right out. If the blotting paper is not used the fluid will form a ring in the fabric almost as unsightly as the original dirt.

Again, if you are using a patent varnish or stain and instructions bid you first sandpaper the workpiece use sandpaper vigorously. The patented article cannot perform miracles.

Here are some simple remedies for removing spots of various sorts:

**Paint.**—If the paint is fresh, turpentine, alcohol or naphtha will probably take out the stain. If the stain is old and dry try chloroform. Put the portion of fabric to be cleaned over several thicknesses of clean cloth before trying to clean it.

**Grease.**—Use French chalk for grease.

## Infants' Washable Headgear

MADE of hand embroidered plush, these bonnets are not only handsome, but decidedly serviceable, since

spots. Apply it thickly and let it stand for several days. If this is not effective sponge the material first on one side, then on the other, with spirit of wine; then press over a piece of thick linen.

**Candle Wax.**—Put a sheet of blotting paper under the spot and another over it. Heat with flatiron and the wax will be removed by the blotting paper.

**Milk.**—White soap and warm water should be used to take out milk stains. It should be used immediately.

**Ink.**—There are various good ink removers on the market and it is well to have a bottle of one of these on hand. Another method is to dip the ink stained article into milk. The milk should not be allowed to dry on, but if it does not remove the ink within a short time it should be washed out and a fresh application of milk made.

**Tea Stains.**—Clear warm water should be used to remove tea stains.

**Coffee.**—Four boiling water through the coffee stains as quickly after the coffee is spilled as possible. This is a never failing remedy if the spots are fresh. Otherwise it may be necessary to repeat it several times.

**Rain Spots.**—When cloth that has not been sponged is spotted from the rain spread a damp cloth over the wrong side of the material and iron it dry.

**Ice Cream.**—Anything on which ice cream has been spilled should be sponged with chloroform. Use several thicknesses of clean white blotting paper under the spotted article.

**Gasoline Spots.**—Sometimes gasoline leaves a ring on cloth in which it has been used to remove a stain. This ring can be removed by holding the rinsed cloth over steam. Sometimes this method does not remove the ring. The only thing to do in that case is to dip the whole of the garment on which the ring appears into gasoline.

**Grass Spots.**—As soon as grass stains are detected on summer frocks cover them with milkmoore or with lard and the stains will disappear.

## OCCUPATIONS FOR WOMEN.

ONE 1400 young woman is employed in a Philadelphia publishing house. Holland has a machine that a girl can operate and make 1,500 cigars a day.

Miss Pearl Souders of Paterson is manager of the widow's pension work in New Jersey.

Eleven young women will leave this country soon to become missionaries in the Jordan field.

Elizabeth Meahan, a Philadelphia girl, recently accomplished a feat never before achieved by a woman, that of swimming across Hampton Roads, a distance of seven miles.

## Black and White Autumn Tailleur AN INTERESTING FROCK

NO wardrobe is considered complete these days without the alluring tailleur. In black and white the gowns are particularly smart. Any woman who wears a black and white gown can feel herself well gowned. She can make absolutely no mistake with this combination.

## ROCK CRYSTAL JEWELRY POPULAR.

THERE is a novelty in jewelry as very new that it has scarcely been put upon the market, so exquisite that every woman who has seen it desires to possess a piece of it, so costly that few are able to purchase any of it, so different from anything heretofore shown that it promises to become a general craze.

This is the rock crystal jewelry which is gemmed with pearls and diamonds. The rock crystal is cut in thin, flat forms and then etched in such a manner that it is at once a suggestion of the star sapphire and the moonstone. A mounting of platinum is then added and white diamonds only or diamonds and pearls, as milady chooses. The completed ornament is so definitely brilliant that it will be most popular among items for wedding gifts for the approaching season, though it is one of the rare fashions that are as suitable for the girl of western and the matron as for the bride.

One of the best designs in which it is shown is the bar brooch. This is not to be confused with the out of mode bar shirt waist pin. The former is one of the ornaments most in vogue at present. There are, however, to be pieces of this rock crystal jewelry introduced in every jeweled thing that is at present in favor. It may be had only of the best of Fifth Avenue jewelers. It promises this fact, that, for it answers to the demand of the mode for glitter, but announces the woman of good taste in that it rejects every hint of garishness.

The latest in rings is so constructed that the flash is directed between the stones of the mounting. The mountings themselves are still of fairly workmanship, so wonderfully wrought are they.

## HOW ABOUT THIS?

THIS ladies' luncheon of two or four cups, washed and joined again by stirrings, are another interesting detail. Give the right hostess and guests, but a huge daylight banquet unspiced with wine and brandy in their best clothes is one to cause dismay to the stoutest heart. It is as a vengeance which every traveler—man or woman—should have. One of them is a small purse holding a cork bottle for smothering snoring, another of ammonia or brandy. Another is a flat case containing a number of paper drinking cups, and a third is an envelope holding paper napkins.

## PURELY FEMINE.

THE happiest girl is she to whom a great variety of hats is becoming.

A PLEASING effect is secured in this frock for a young girl by combining a short tunic of blue linen with a

## TRAVELING CONVENIENCES.

INCASED in leather so that germs cannot corrupt them are three containers for every traveler—man or woman—should have. One of them is a small purse holding a cork bottle for smothering snoring, another of ammonia or brandy. Another is a flat case containing a number of paper drinking cups, and a third is an envelope holding paper napkins.

## TWO PRETTY BONNETS.

By removing the ribbon each one can be laundered when soiled. Tiny bunches of flowers could be used in place of the ribbon ties.

committee and already much has been done toward making this the event of the season. Not the least interesting number will be a demonstration of boy scout work by the local troop.

Nelson Spencer, M.P.E., accompanied by H. H. Brown, relief commissioner, entered into Bow Island on Friday from Medicine Hat to ascertain how the relief measures were working. Mr. Spencer, it may be added, was largely instrumental in getting the Dominion government to grant the aid, and naturally therefore he is maintaining a close and personal interest in the arrangements.

### 40-Mile Rural Municipality.

Proceedings of Council of Rural Municipality of Forty-Mile, September 12th, at Fertile Plains.

Meeting called to order by Deputy Reeve Elford. Councilors present: Elford, Hanna, Walker and Audible. Upon motion, the secretary was instructed to write the Department requesting the aid, and naturally therefore he is maintaining a close and personal interest in the arrangements.

The secretary was instructed to give Clarke McCarty Carson and MacLeod the information required and referring them to T. S. Hanna for further information, also to ask the Department what assistance the government will give the schools, until taxes are paid the Municipality.

Motion by Councillor Hanna that secretary make corrections on tax roll south half of 15-11.

The following bills were allowed:—  
Alberta Gazette, \$4.00  
S. T. Elford, moving machinery and use of engine, \$11.00  
F. K. Osborne, goods ordered in mistake by W. S. Henry, \$11.25

The secretary then laid on the table a statement showing arrears of taxes—municipal \$220.75, also \$688.79, arrears of school taxes.

After making an estimate of the expenditure for the year, Councillor Hanna moved that we strike a rate for municipal purposes of one mill on the dollar.

The following requisitions for levy of school taxes were passed and ordered entered on roll:—  
Balloun, \$800.00  
Borden, \$65.00  
Charing, \$30.50  
Lancaster, \$140.00  
Fertile Plains, \$70.00  
Haycraft, \$11.40  
Jassan, \$155.00  
Compuerville, \$28.20  
Neighbourview, \$70.00  
Sunaba, \$700.00  
Westfield, \$100.00  
Seiz, \$75.00

Motion by Councillor Walker that the secretary write the Department of Public Works that the road inspector saw Bill to change the road from where the survey was made between sections 27 and 28-8-11, and asking for a new survey between sections 27 and 22.

Considerable discussion took place as to whether or not the Municipality should purchase a road grader. In view of the fact that we have over 40 miles of graded road which must be taken care of in future and that the government will operate the grader along with their own for the rest of the season in our Municipality, it was decided upon motion to purchase a grader through the government.

A motion of adjournment to meet at Westfield October 17th carried.
